Project News

Multifleck Flooring Mountford Park, Auckland

New Zealand's foremost specialist coating group Special Finishes has recently completed the transformation of the Jasmax designed Mountford Park Stadium project ensuring many years of trouble free operation for the client by using the internationally proven Multifleck Flooring System for this project.

BRINGING TECHNOLOGY TO THE SURFACE

The Multifleck Flooring System is a solvent free decorative flooring system which has been used internationally for over 25 years providing excellent durability and performance whilst retaining its aesthetically pleasing attributes in the harshest environments.

"Multifleck is highly recommended for Retail and Shopping Centre applications, Kitchens, Ablutions, Schools and Public Access Areas, and anywhere where Terrazzo, Polished Concrete or vinyl would have historically been used" says Barry McGee, National Sales Manager of Special Finishes Limited. "In addition to being extremely durable and aesthetically pleasing, Multifleck offers clients an *environmentally friendly alternative* to high VOC systems (such as polyester terrazzo) and vinyl. Our clients are becoming very conscious of the effects various elements of their building may have on the environment, including the use of Volatile Organic Compounds (VOC's) and their impact on the environment post life cycle, when the building is demolished".

One of the other major benefits of the Multifleck Flooring System is its fire ratings, which are exceptional. Multifleck complies with IMO Resolution A.653(16) and Germanischer Lloyd have certified it along with the CSIRO, enabling it to be used in marine environments.

In addition to providing the client with an excellent flooring system, Special Finishes also directed the client on the best possible method of cleaning the floor using a Karcher scrubber drier unit and specialist cleaning regime.

This not only ensures that the client is able to clean the floor effectively and efficiently but also comply with their warranty obligations so that they have trouble free flooring.

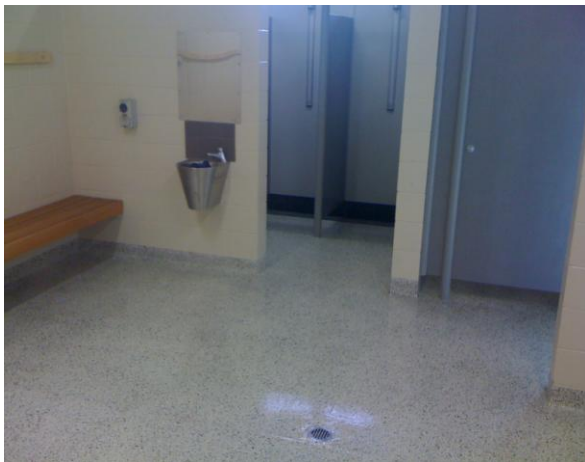

BRINGING TECHNOLOGY TO THE SURFACE

Special Finishes also manufacture a complete range of specialist coatings for all substrates including;

- Multifleck Wall Coatings
- Graffiti Protection Coatings (Waterbased and Polyurethane)
- High Build Acrylic Wall Coatings
- Enamel Coatings
- Ceiling & Wall Coatings
- Elastomeric Roof Coatings
- Epoxy & Polyurethane Floor Coatings
- Car Park Deck Waterproofing Systems
- Flexible Jointing Systems
- Marine Paints and Coatings
- Thermal, Condensation Reducing and Sound Insulation Coating Systems
- Steel Coatings
- Waterproofing Systems
- Lacquers, Clear Sealers & Glazes
- Timber Coatings & Stains
- Automotive Products, Fillers, Rust Proofers and Underseals
- Road Marking Coatings
