Transforming New Zealand's Schools

Torbay School Hall

Special Finishes has recently completed the transformation of Torbay Schools hall using Special Finishes' Graffiti Coat

Graffiti Coat not only protects the coated surfaces against graffiti and vandalism, but also helps with day to day cleaning of the surface, by repelling dirt.

The advantage of using Graffiti Coat in this particular environment during winter is that it is waterbased (unlike traditional enamel paints), and does not have an offensive odour, or give students & teachers headaches.

Graffiti Coat was also applied in a clear over the art work that had been fixed to the walls of the hall, protecting it also from graffiti attack and vandalism.

BRINGING TECHNOLOGY TO THE SURFACE

New Zealand's foremost specialist coating group Special Finishes has installed the Graffiti Coat System to the walls of the Torbay School Hall.

This system will provide protection against graffiti and vandalism which is unfortunately prevalent in schools throughout the country.

Graffiti Coat is simply applied by brush or roller over a well prepared and primed substrate.

The finish even with brush and roller leaves you with the impression that the system has been applying by spraying.

Graffiti Coat is one of many different coating solutions manufactured by Special Finishes Limited. If you have a surface that requires coating, from floors to walls, furniture to doors, let us know!

- Multifleck Wall Coatings
- Graffiti Protection Coatings
- High Build Acrylic Wall Coatings
- Waterbased Enamel Coatings
- Ceiling & Wall Coatings
- Elastomeric Roof Coatings
- Epoxy & Polyurethane Flooring
- Flexible Jointing Systems
- Marine Paints and Coatings
- Thermal Insulation Coating Systems
- Steel Coatings
- Lacquers, Clear Sealers & Glazes
- Timber Coatings & Stains
- Waterproofing Systems
- Anti-slip Safety Coatings
